

Pain Management

Almost everyone can benefit from compounded medication

Here at Premier, some of our most popular pain management offerings include:

- **Dosage forms such as topical gels and creams that can be applied directly to the painful site.**
- **Topical formulations that are designed to bypass the gastrointestinal tract to reduce systemic symptoms of pain medications, while providing direct pain relief to the affected area.**
- **Troches, nasal sprays, or suppositories for patients who have difficulty swallowing pills.**
- **Combination capsules made into a single dose to reduce pill burden as well as personalized strengths to satisfy your acute or chronic pain needs.**

Pain is not the same for each person, so we take a personalized approach to reduce pain for each of our patients. We offer pain management order forms for physicians. They

can use these forms to customize combination pain topicals and their strengths to best suit their pain management needs. Please do not hesitate to contact us with any questions or concerns about how we can assist you.
