

Veterinary

Premier Custom
Pharmacy

Trying to administer medication to an animal is not always easy!

We offer solutions to problems by compounding specialized medications which meet the unique needs of many animals

Pets and animals of all kinds can benefit from compounded medication. Similar to children, animals may need specific doses and ingredients of medication that require compounding.

Whether it is a cat that refuses to take pills or a dog that needs a specific dosage not available commercially, our veterinary compounds can be customized to your pet's needs. We create flavored liquids, chewable treats, transdermal gels, and other medication solutions to make administration easier.

We offer medications for most animals, including but not limited to:

- **Dogs**
- **Cats**
- **Birds**
- **Small Mammals**
- **Reptiles**
- **Zoo/Aquarium animals**

Our animals are part of the family, and we offer solutions to keep your pets happy and healthy. If you have any questions, please do not hesitate to contact Premier Custom Pharmacy.

Please note: Compounded medications from a compounding pharmacy are not intended for use in food and food-producing animals. All animal products require a prescription from a licensed veterinarian. Contact us if you need help looking for a veterinary provider.

Thank you for allowing us to be a part of your therapeutic, healthful regimen. If you have further questions, please contact us.
