Pharmacy

Almost everyone can benefit from compounded medication

Sports injuries are a reflection of the wear and tear of a wide variety of activities. These injuries may include sprains, strains, or different types of inflammation provoked from physical activity. Here at Premier, we value getting athletes back to the sport they love.

Some of our most popular sports medicine solutions include:

- **Combination topicals for neuropathic or joint pain and inflammation**
- **Topical podiatry formulas including formulas for blisters, corns/callouses, heel spurs, plantar fasciitis, and fungal infections**
- **Sun protection agents such as creams, ointments, lip balms and agents for sunburns**
- **Topical agents for muscle spasms/leg cramps**
- **Vitamins and supplements for wellness and injury-prevention**

- **Formulas for patients with excessive perspiration**

We value being able to cater to individual customer needs and help people manage pain from sports-related activities. Pain creams can be used to deliver a combination of medications topically to the area of injury to provide quick, effective relief with less side effects than if taken orally.

Thank you for allowing us to be a part of your therapeutic, healthful regimen. If you have further questions, please contact us.
