

Elderly

Patients

Almost anyone can benefit from compounded medications

When it comes to their personal health, our loved ones who may be in assisted living or hospice care require intensive care and supervision. These patients and their caretakers may find it easier to manage medications with the help of Premier Custom Pharmacy's extensive selection of medication services. Our compounding services are especially helpful to elderly individuals who take multiple prescriptions, have difficulty swallowing, need NG tube-safe formulations, or possess sensitivities to additives. Some of our custom offerings include:

- **Higher viscosity formulas for patients who have difficulty swallowing or dysphagia**
- **Fecal incontinence regimens**
- **Topical pain creams**
- **Wound healing creams**

- **Patient-specific dosing in extended-release or immediate-release capsules**
- **Combination formulas that can incorporate multiple medications into one product**

We provide a hospice order form with offerings including but not limited to ulcer and wound care, nausea/vomiting topicals and suppositories, hemorrhoid pain creams, rinses for mouth pain, and adult diaper rash solutions. Prescribers can use this form to prescribe hospice preparations using our ready-made formulas and suggested instructions.

We value providing customized, quality care to all patients. Please call or text us at (561)944-3146 to discuss your pharmaceutical needs.

Thank you for allowing us to be a part of your therapeutic, healthful regimen. If you have further questions, please contact us.
